## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Allowable Subject Matter*

2. Claims 1-16 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious a measuring apparatus having a light beam entering means for entering a light beam into said dielectric block at various incident angles within an angle range that satisfies the conditions of total reflection at the interface between said dielectric block and said metal film, and creates two or more dark lines due to attenuated total reflections in a light beam totally reflected at said interface; a light detecting means for receiving said light beam totally reflected at said interface, and detecting positions on a light receiving surface of said two or more dark lines contained therein; and a calculation means for calculating a variation in each of said positions of said two or more dark lines on said light receiving surface arising from a change in the dielectric constant of a substance placed on said transparent dielectric film with reference to one of said two or more dark lines having the least positional variation on said light receiving surface among said two or more dark lines, based on the output of said light detecting means, and in combination with the other recited limitations of claim 1. Claims 2-16 are allowed by the virtue of dependency on the allowed claim 1.
